With over 7 years of experience, I specialize in building end-to-end digital products (SaaS), transforming Figma and Adobe XD mockups into functional solutions. My approach merges UX/UI design with solid engineering using Angular, Ionic (PWA), and TypeScript, supported by strong foundations in HTML, SCSS, and JS. I architect scalable systems with PHP (MVC) or Node.js (Express.js), integrating SQL/NoSQL databases and REST APIs. I power applications through advanced AI (OpenAI, Whisper, Ollama) and n8n to deliver autonomous, secure, and high-impact digital experiences.

## PROFESSIONAL EXPERIENCE

### Fullstack Developer (Product Lead)

Rhinomachinery.com | Remote | Texas, USA | Jan 2024 – Present

Orchestrated the end-to-end digital transformation of a legacy e-commerce platform into a SaaS system. Architected a custom PHP MVC engine and integrated AI workflows (LLMs/n8n) to optimize delivery. Focused on high-performance UX/UI and scalable APIs to reduce costs.

### Frontend Engineer & UX Specialist

MYMA Marketing & Medios Alternativos | Hybrid | Mexico City, Mexico | Aug 2019 – May 2024

Led frontend engineering and UX for high-traffic PWAs (Angular/Ionic) serving global brands like Netflix. Translated complex Figma prototypes into production-ready interfaces, bridging the gap between creative vision and technical execution under tight deadlines.

### UI/UX Developer

ofi.com.mx | On-site | Mexico City, Mexico | Jul 2017 – Jun 2019

Spearheaded the UI/UX redesign of e-commerce ecosystems, focusing on CRO and user engagement. Developed responsive frontends and digital assets, ensuring visual consistency and performance to significantly improve retention and conversion rates.
